Portfolio | GitHub | LinkedIn | LeetCode

Career Objective

Aspiring Software Developer with hands-on experience in Java, React, Bootstrap, Spring Boot, figma ,python, C and MySQL through academic and personal projects. Strong in Data Structures & Algorithms, problem-solving, and building efficient software solutions while continuously learning new technologies.

Education

Dr APJ Abdul Kalam Technical University

B.Tech – Computer Science & Engineering

CGPA: 8.5

2022 – 2026

Relevant Courses: DSA, DBMS, OS, Java, Web Development, CN

Skills

Programming Languages	Java, C, JavaScript, Python, SQL
Web & Full Stack	HTML5, CSS3, React, Bootstrap, Spring Boot, Spring Data JPA, REST APIs, Maven
Databases	MySQL, PostgreSQL, H2 Database
Deployment, Tools & Cloud	Git, GitHub, Postman, VS Code, Vercel, Render
Soft Skills	Leadership, Communication, Time Management, Project Management

Internships & Workshops

AI Azure Intern

Edunet Foundation

Certificate

Duration: May 2025 – June 2025

- Gained hands-on experience in cloud environments and cognitive services by developing and deploying basic AI/ML models on Azure under industry guidance.

Innovation and Design Thinking

ERA Foundation - Kalam Pragati

Certificate

Duration: March 2025 – June 2025

- Learned Figma, 3D design, Arduino, and laser cutting. Developed an IoT-based 'Nagar Nigam Complaint Tracker' to enable instant, transparent civic grievance filing for faster real-world resolutions

Python Developer Intern

VaultOfCodes

Certificate

Duration: April 2025 – May 2025

- Utilized Python to write optimized backend logic, debug software applications, and build scalable database workflows

Projects

Student Performance Tracker

Project Link

- Developed a web-based application for tracking student performance.
- Developed a web-based application for tracking student performance.
- *Tools Used:* Java, ReactJS, MySQL, Bootstrap, JavaScript, Figma

Public Utility Management System

Project Link

- Working on: "Helping Citizens Track Nagar Nigam Complaints".
- Work with team. Experience in Kalam Pragati Program, AKTU campus.
- *Tools Used:* HTML, CSS, Bootstrap, JSON, Java, SQL database , Figma

Abhyantra - Women's Safety Platform

Project Link

- A women's safety application designed to provide emergency assistance, incident reporting, and location-based support.
- The platform enables users to raise safety alerts, track reported incidents, and helps authorities respond efficiently through a centralized management system.
- *Tools Used:* Java 19, Spring Boot 3, react.js, Mysql

Achievements

Advance Java(GeeksForGeeks), NPTEL(ML), Web Development(CodeSoft),Wells Fargo Software Development Forage program
